

BUDO-NORD

# SPORTS MATS

Durable interlocking edges

**NEW MODEL!**

**ATHLETIC ACTIVITY** can be brutal on your body. Ankles, knees – actually all joints get punished severely by the tremendous forces of impact they encounter during athletic activity. In many sports, the foot – and hence joints – are protected by various cushioning systems built into shoes. Martial arts are done with bare feet, and the absorption of shock by dissipating vertical impact and dispersing it into a horizontal plane must be done by something else than a shoe. It must be done by the mat.

This alone would be reason enough to choose **BUDO-NORD SPORTS MATS** which are made entirely from shock absorbing Polymers.

**BUDO-NORD SPORTS MATS** also feature

BUDO-NORD's newly developed jigsaw pattern which dramatically prolongs mat life as well as making them easier to assemble and disassemble.

When purchasing mats, it is easy to end up with a product that cannot be used in public locations as they violate fire codes and do not conform to the CE regulations. Indeed, even if the mat is not to be used in public locations, you would not like to end up with a product which is a fire hazard and maybe also contains toxins and harmful heavy metals.

**BUDO-NORD SPORTS MATS** meet the requirements of CE directive EN-71, and has passed EN71 part 2:2003 flammability test. In fact, **BUDO-NORD SPORTS MATS** are so safe they are certified be used in kindergartens !

Approved by the European Taekwondo Union

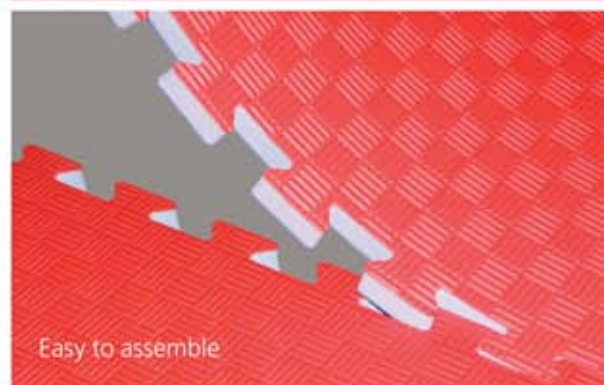

## EASY TO USE

Budo-Nord mats are easy to use. No particular preparations are necessary. The mats can be laid out on any smooth surface. Assembly is easy and can be done without prior experience. Before you assemble a mat on your floor, sweep it and remove all objects. **Start** in the middle and work your way outwards. **Wipe off** the mats before you pile them and put them in storage. **Pile** them straight, so that no single edge is exposed. **If possible**, support the edges while storing. **If the mats** are dirty, clean them with a moist cloth using a mild detergent. Do not soak the mats. If they need thorough cleaning, wash them one at a time with warm water again using a mild detergent.

The mats are easily cut with a carpet knife. Practical if you want to work your way around pillars, or if you want a straight edge.

Easy to assemble

"The mats from Budo-Nord are of very high quality and easy to assemble. The best mats I have seen".

**MR. JÜRI PÖLD** is the organiser of the 43 European Karate Championships, held in 2008 in Tallin, Estonia.

### NIKLAS ANDERSSON

4th dan WTF Taekwondo. Runs one of Swedens most successful Taekwondo clubs, Soo Shim Taekwondo Club.

The club has more than 300 M<sup>2</sup> of BUDO-NORD mats, training 5 days a week, 4 hours a day.

I have extensive experience with the mats. From both training and competition, and I recommend them highly".

**JESPER ROESEN**, National Coach Danish Taekwondo team. 3 times European Champion, 2 times vice World Champion.

### TECHNICAL INFORMATION:

**Size:** 100 x 100 cm +/- 2 mm.

**Thickness:** 2,3 cm +/- 1 mm.

**Weight:** Approx. 3,4 kg/ mat.

**Density:** 123,5 kg/M<sup>3</sup>

**Flammability tested** and passed according to EN71 part 2:2003

**CE – EN-71.**

**Non-toxic.**

**No odour.**

**Colours:** Red/blue reversible. Other colours available, please contact us.

**Packaging:** 10 mats/carton.
